Projects

Burauza no Akachan (Browser Babies)

- A homage to Tamagotchi, we aspired to create a similar style of game where the player can take a pet on the go.
- Utilizing html, css, nes.css, and javascript along with APIs like kanye.rest and moment.js
- <https://richmonddz.github.io/BURAUZA-NO-AKACHAN/>
- <https://github.com/richmonddz/BURAUZA-NO-AKACHAN>

Rllr-Decks

- A social media platform catered to Pokemon fans.
- Built with multiple technologies and packages like bcrypt, mysql2, sequelize and express.
- <https://github.com/richmonddz/Rllr-Decks>
- <https://project2-rllr.herokuapp.com/>

Daily Planner

- A simple to use daily planner that adjusts in real time.
- The planner uses HTML, CSS, JavaScript and moment.js
- <https://richmonddz.github.io/Work-Day-Scheduler/>
